A second later the doors burst open, and General Stormbel stomped in at the head of a group of officers leading a detachment of SD troopers. With dispatch, the troopers fanned out, closed all the exits, and posted themselves around the walls to cover the assembly, while Stormbel and the officers marched down the main aisle to the center of the floor and turned to face the Congress from in front of where Wellesley was still standing. Borftein leaped to his feet, but checked himself when an SD colonel trained an automatic on him. He sank into his seat, a dazed expression on his face..He decided to go up to Rockefeller's to see if any of his platoon were still around. On the way his pace slowed abruptly. Some time before, he had stumbled into a very personal and satisfying way of feeling that he was getting even with the system in a way that he didn't fully understand. Theft and greed are impossible, because how can you steal another man's competence? Oh, you could try and fake it, I suppose, but you wouldn't last long with people as discerning as Chironians. They can see through a charlatan as quickly as we can spot ourselves being shortchanged. In fact to 'them that's just what it is. They have their violent moments, sure, but nothing as bad as what's coming in from Africa on the beam right now, or what happened in 2021. But it never turns into a really big problem. Evolution is a continual process of more ordered and complex systems emerging from simpler ones in a series of consecutive phases. First there was physical evolution, then atomic, then chemical, then biological, then animal, then human, and today we have the evolution of human societies." Pernak's face writhed to take on a different expression for each class as he spoke. "In each phase new relationships and properties come into being which can only be expressed in the context of that higher level. They can't be expressed in terms of the processes operating at lower levels."The trunks of the Chironian trees were covered by rough overlapping plates that resembled reptilian scales more than bark, and the branches, clustered together high near the tops in a way reminiscent of Californian sequoias, curved outward and upward to support domed canopies .of foliage like the caps of gigantic mushrooms. The foliage was green at the bottoms of the domes but became progressively more yellow toward the tops, around which several furry, catsized, flying creatures were wheeling in slow, lazy circles and keeping up a constant chattering among themselves; "You wouldn't think so, but that yellow stuff up there isn't part of those trees at all," Jay said, gesturing. "Jeeves told me about it. It's a completely different species'--a kind of fern. Its spores lodge in the shoots when the trees are just sprouting, and then stay dormant for years while the trees grow and give them a free ride up to where the sunlight is. It invades the leaf-buds and feeds through the tree's vascular system."."I don't know, Corporal. Recently, I guess."Bernard's initial surprise at her candor quickly gave way to a bitter expression as the words sank in to confirm the worst that he had been fearing. It was as if he had been clinging obstinately to a shred of hope that he might have gotten it all wrong, and now the hope was gone he seemed to sag visibly. Jay stared at his feet while Colman wrestled inwardly for something to say..Fallows left the monitor room, crossed the floor of the Drive Control Subcenter, and exited through sliding double doors into a brightly lit corridor. An elevator took him up two levels to another corridor, and minutes later he was being shown into an office that opened onto one side of the Engineering Command Deck. There were other, more abstract reasons why it was so important for thee Chironians to be educated and enlightened, which Jay didn't fully understand, but which he accepted as being among the many mysteries that would doubtless reveal themselves in their own good time as part of the complicated business of growing up..Instead of seeking chairs, they remained standing for the show..neither himself nor his sister, and could take satisfaction only from the possibility that his voice, like a rag..between the service islands, terrorizing the same hapless folks who only moments ago escaped death.Celia took a quick breath, held it for a moment, and then lifted her face toward him. A cart was following them with a few odds and ends inside. He gaped at Bernard and Jay in surprise, then grinned. "Hey! So Jay dragged you out to see the sights, eh? Hello, Jay. Started making friends already?" Introductions were exchanged with smiles and handshakes. The two new Chironians were Sal, a short, curly-headed blonde who pursued research in physics at a university not far from Franklin, and Abdul, a

WELLESLEY STOOD TO deliver his final address from in front of the Mission director's seat at the center of the raised dais facing out over the Congressional Hall of the Mayflower in Government Center. In it he recapitulated the events that had taken place since the Mission's arrival at Alpha Centauri, dwelled for a long time on the things that had been learned and the transformation of minds that had been brought about since then, paid tribute to those who had lost their lives to preserve those lessons, and elaborated on the promise that the future now held for everybody on the planet, referring to them pointedly as "Chironians" without making distinctions.. a rattle of words raps out of him between guffaws: "Oh, damn . . .
